

BVR for distribution boxes

Overview

BVR wire is a kind of soft wire for distribution cabinets, also called secondary wire. It is loved by the majority of electricians and building decoration personnel. Stiff conductors crack during repeated bending. Untinned copper oxidizes fast in humid or chemical-exposed panels. And most flexible wires sacrifice. The ZR-BVR Flame Retardant Multi-Strand Copper Wire is a flame-retardant, single-core, unsheathed cable featuring high-purity Class 2 copper conductors. Insulated with premium flame-retardant PVC, it meets IEC 60332-1-2 standards for flame resistance. With a rated voltage of 450/750V, this wire is. Building wire is used to carry electricity into or within buildings and structures, and can be employed for a variety of commercial and residential applications – including electrical wiring systems, power generators, motors and electrical lights. ACWU and NMWU, in particular, are well-suited for. A: We offer Power Cable, including medium voltage power cables, medium voltage power cables, high voltage power cables, Control cables, fireproof cables, various special cables such as airport cables, transportation cables, marine cables, and various customized products required by customers. Q: For items delivered from outside the European Union, you may be subject to additional charges for VAT and, when applicable, customs duties in your country.
