

C300 Optical Module

Overview

ZXA10 C300, the world's first future-proof and largest capability optical access platform, is developed with mass optical access roll-out as well as economy in mind. What you will learn: We provide a deep technical analysis of the ZTE C300's hardware architecture, including its control boards, switching matrix, uplink capabilities, and. The ZXA10 C300 can be connected with MDUs/ONUs/ONTs through various networking technologies. The ZXA10 C300 device consists of the switching and control cards, PON interface cards, uplink cards, Ethernet interface card, P2P interface cards, TDM interface cards, and common interface card. Higher security assurance: ONT. The ZXA10 C300 Optical Access Convergence Equipment (ZXA10 C300 for short) is a 10U-height OLT device, which satisfies the market requirement for large-capacity OLTs. This manual describes the hardware structure of the ZXA10 C300. With the requirements of communication services increasing, the value. The plug-and-play design ensures easy installation in fiber switches, ideal for telecommunications and data center applications.
