

## Delivery time for 1U server rack

### Overview

Upgrade your server setup with top rackmount cases like Supermicro SuperChassis and Cisco Rack Mount.

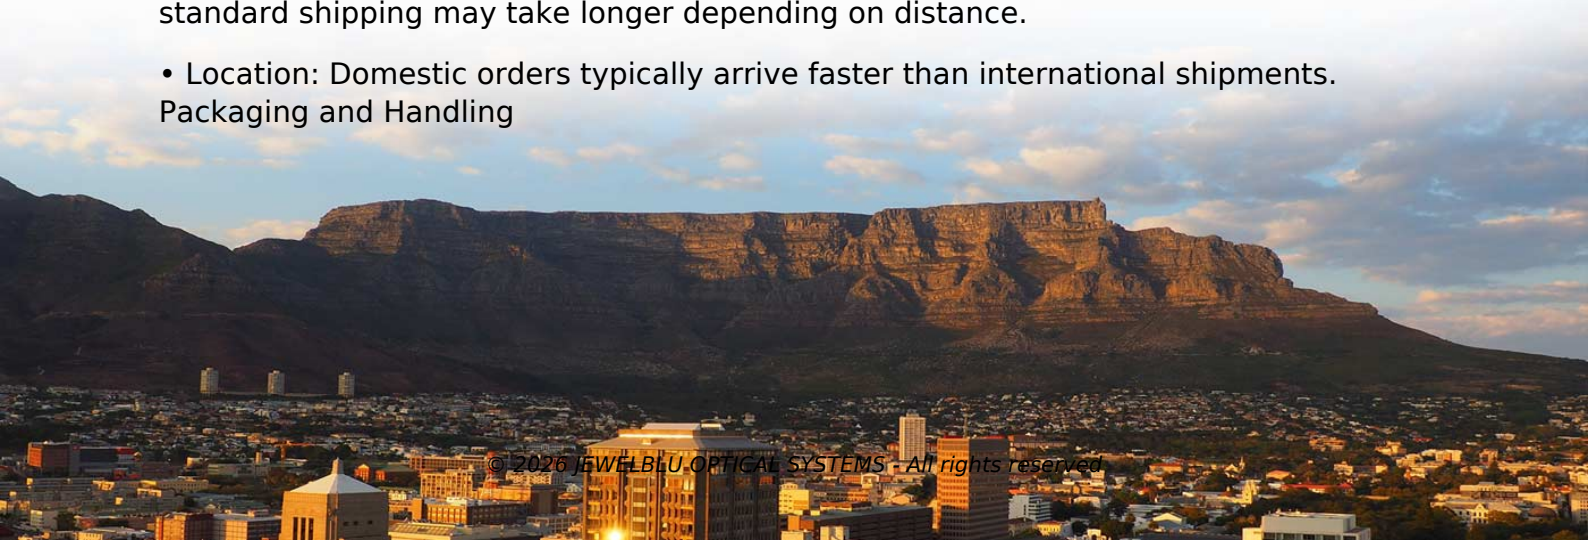

### Key Takeaways

Many 1U rack servers, such as Supermicro Gold Series models, can ship within 24 hours. Typical Delivery Time

For standard 1U rack servers, vendors like Supermicro offer models that are ready to ship within 24 hours once an order is placed. This applies to popular configurations such as single-processor or dual-processor 1U servers, which are optimized for small to mid-size workloads. Delivery time may vary depending on the vendor, stock availability, and shipping location.

#### Factors Affecting Delivery

- Vendor and Model: Some 1U servers are pre-configured and in stock, while custom configurations may require additional assembly, extending delivery to several days or weeks.
  - Shipping Method: Expedited shipping options can reduce transit time, while standard shipping may take longer depending on distance.
  - Location: Domestic orders typically arrive faster than international shipments.
- Packaging and Handling

1U servers are compact (1.75" height, 19" width) and are shipped in specialized packaging that protects the server during transit . Vendors often use foam inserts and adjustable boxes to accommodate different server depths, ensuring safe delivery.

#### Practical Advice

- Check the product page for the specific 1U server model to confirm stock and shipping estimates.
- For urgent deployments, prioritize models labeled as “ships within 24 hours”.
- Consider vendor support for tracking and expedited shipping if timing is critical. By selecting in-stock 1U servers from vendors like Supermicro, you can typically expect next-day shipping, with total delivery depending on your location and chosen shipping method .
