Key Takeaways

The BCRD only covered access to utility network infrastructure such as ducts and cables. In comparison, the GIA now includes accessing any physical infrastructure capable of hosting fibre, antennas, and network equipment, including telephone poles or traffic lights. The consultation period for the key points paper by Federal Digital Minister Karsten Wildberger (CDU) for a further amendment to the Telecommunications Act (TKG) runs until the weekend. quotas should be allocated among applicants as soon as. As prescribed in 4. As used in this provision, "covered telecommunications equipment or services" and "reasonable inquiry" have the meaning provided in the clause. Recommendation ITU-T L. 163 describes criteria for the installation of optical fibre cables defined in Recommendation ITU-T L. 110 in remote areas with lack of usual infrastructure for installation including the procedures of cable-route planning, cable selection, cable-installation scheme selection. An overview of key regulatory requirements for the provision of communications services around the globe, including licensing, interconnection, consumer protection and fees. Our global telecommunications team brings extensive regulatory, transactional, technical, and commercial expertise to advise. The European Commission (EC) has given a lot of attention to the matter of how access prices should be set so as to encourage investment in very high capacity networks whilst maintaining effective competition at the retail level. The guidelines developed in Europe provide a useful benchmark for.
