

How to check the power rating of a construction site electrical distribution box

Overview

The electrical panel must have a sufficient ampere rating to handle the total load of the electrical system (NEC 408). Circuit breakers must be rated correctly for the circuits. An outdoor electrical distribution box serves as the critical junction point where incoming power lines are split into multiple branch circuits for outdoor installations, parking lots, building exteriors, and industrial facilities. The references on this page provide information related to electrical in construction including OSHA's electrical construction regulations, hazard.
