

How to install a fiber optic drop cable terminal box

Overview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. A. Before starting the installation process, a series of preparations should be carried out. With various sizes and high resistance it allows for flexibility in operation and installation. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. The indoor fiber distribution terminal is a compact fiber box solution for installation requirements in small to mid-sized MDUs, multiple dwelling units, or multiple tenant units (MTU). It serves as a termination point for optical fibers, providing a secure and organized space for connecting and managing fiber optic cables.
