

Invisible fiber optic cables and network cables

Overview

Invisible Fiber Cable is a cutting-edge development in the world of fiber optics. It offers all the advantages of traditional fiber optic cables—such as high-speed data transfer, low latency, and reliable connectivity—while being designed to blend seamlessly into the environment. Unlike traditional setups, where a single fiber connection is distributed across multiple rooms, FTTR ensures that each room has its dedicated fiber connection. 2mm (standard network cables are 6mm or thicker).
