

## Kuwait DAC High-Speed Cable PAM4

### Overview

QSFP112 passive copper cable assembly feature eight differential copper pairs, providing four data transmission channels at speeds up to 100Gbps(PAM4) per channel, and meets 400G Ethernet and InfiniBand Next Data Rate(NDR) requirements. Siemon's 200G (50G per lane) PAM4 Ethernet or InfiniBand™ QSFP56 passive and active copper cable DAC1 assemblies are designed to exceed industry standard performance offering a cost-effective, low latency, low-power option for high-speed data center network equipment direct connections. The OSFP-400G-DAC provides an OSFP-to-OSFP copper direct-attach solution with a finned-top form factor. 3 Built for 224 Gbps-PAM4, these robust cables offer superior mechanical durability and excellent shielding to minimize crosstalk and deliver better signal. mbly features low insertion loss and low cross talk. QSFP56 uses P M4 signals for transmission, which doubles the rate. For detailed Spee t availability are subject to change without notice. Copyri ht © 2025 Ascent C mmun.
