

List of High Voltage Distribution Box Models

Overview

High Voltage Power Distribution Unit Below you will find our selection of High Voltage Power Distribution Units, each designed to meet the demands of moder.

Key Takeaways

High voltage distribution boxes come in various models and configurations, including single busbar, double busbar, sectionalized, and EV-specific power distribution units. Industrial and Commercial Models

- Single Busbar Distribution Box – Designed for simple power distribution in moderate-load environments, easy to install and operate, suitable for small commercial buildings .
- Double Busbar Distribution Box – Provides redundancy and flexibility, ideal for industrial facilities with large power requirements, allows uninterrupted supply and easier maintenance .
- Sectionalized Distribution Box – Divides the network into smaller sections for better load management, commonly used in large commercial properties or multitasking industrial units .
- Integrated High Voltage Box – Combines internal busbars and circuit breakers in a compact system, suitable for critical infrastructures like data centers, hospitals, and manufacturing plants .

- Gaobo Custom High Voltage Cabinets – Includes switchgear, electrical boxes, and switch panels, tailored for industrial power distribution needs .
 - Rawsuns EV High Voltage Distribution Box – Features power distribution, current measurement, short circuit protection, charge/discharge control, pre-charging, manual emergency stop, and insulation testing ports, specifically for electric vehicles .
 - Valeo High Voltage Power Box – Combines Onboard Charger (OBC), DC/DC converter, and Power Distribution Unit (PDU) for EV applications, converting AC from the grid to DC for high voltage batteries .
- Additional Enclosure Options
- EJB Series – Explosion-proof or fire-resistant enclosures with IP66/67 waterproof rating, suitable for hazardous environments .
 - PPWB-24SC-WP – Fiber optic distribution management enclosure for indoor/outdoor wall-mounted applications .
 - JX59 Single-Core Series – Plastic housing for strong current connections in high voltage distribution systems .
 - AK-NW-40 – Cost-effective plastic distribution box for electronic PCB design and sensor housing . These models vary in size, material, and functionality, ranging from industrial-grade metal enclosures to compact EV-specific units. When selecting a high voltage distribution box, consider load requirements, environmental conditions, safety standards, and application type to ensure optimal performance and reliability.
