

Maldives Alloy Spectrometer Manufacturer

Overview

MassTech is the only license holder and producer of AP MALDI ion source technology, and is the recognized leader in AP MALDI development and manufacturing. We are world leaders in the development and application of X-ray photoelectron spectroscopy (XPS) for the analysis of surface properties of a wide range of materials. Over the decades Kratos has been at the forefront of developing X-ray photoelectron spectrometers, data acquisition and processing. We design and manufacture world-class gas analysis systems and emission monitoring solutions to measure gaseous emissions from industrial processes, gases released from natural sources into the atmosphere, and gases present in working environments. We design and manufacture world-class gas. Elvatech designs and manufactures advanced handheld and benchtop systems that deliver laboratory-level accuracy in the field and in the lab, helping you identify metals, alloys, scrap, jewellery, soil and other materials in seconds. Our instruments are used by companies worldwide for reliable. Locate your local SPECTRO Analytical Instruments office with our global directory. Established in 1997 as a pioneering testing facility in Maldives has grown into a leading provider of accredited testing services. At Alphamet, we are committed to continuous improvement, ensuring our service offerings consistently meet the evolving demands and highest industry standards.
