

Manufacturer of New Type Optical Cable Trays

Overview

The Optical Tray is a premium choice in the Fiber Optic Equipment category. Key factors include fiber type (single-mode vs.

Key Takeaways

Leading manufacturers of new type optical cable trays include Vichnet, Basor Electric, Jiangsu Holdee Electric, and Mulder-Hardenberg, offering solutions for data centers, industrial, and telecommunication applications. Key Manufacturers and Their Offerings

Vichnet provides a comprehensive fiber cable tray system designed for data centers, enterprise networks, and mobile switching centers. Their trays feature a closed design for cable protection, flame-retardant plastic construction, excellent bend radius control ($\geq 40\text{mm}$), and movable cable exit kits for flexible cabling needs. The system supports tool-free assembly, reducing installation and maintenance time while ensuring an elegant appearance and reliable fiber management. Basor Electric specializes in optical cable management systems for data centers and telecommunication facilities. Their products include cable ladder runways and fiber-optic cable trays made from halogen-free PC-ABS material, ensuring safety and bend radius management. Basor trays are designed to prevent damage to sensitive optical cables and are suitable for high-density server environments. Jiangsu Holdee Electric Co., Ltd. and other Chinese manufacturers like TONGZHOU Machinery and Shenzhen Hanxin Communication Optical Fiber Cable Co., Ltd. offer large-scale production of optical cable trays. These companies provide OEM/ODM services, high daily output, and integrated quality control systems. Their trays are suitable for indoor and outdoor fiber optic installations, supporting multi-core cables and high-performance network infrastructure. Mulder-Hardenberg offers the YellowDuct® system, a modular and flexible fiber optic cable tray solution. These trays are halogen-free, low smoke, and recyclable, meeting strict safety regulations. The system is compatible with other cable tray systems and is designed for quick installation, minimizing downtime in data centers, server rooms, and structured cabling projects.

Considerations for Selection

When choosing a manufacturer for new type optical cable trays, consider:

- **Material and Safety:** Flame-retardant, halogen-free, and LSZH properties for fire safety.
- **Bend Radius and Cable Protection:** Ensures optical signal integrity.
- **Modularity and Installation:** Tool-free assembly and flexible configurations reduce labor costs.
- **Global Shipping and Support:** Manufacturers with international logistics and after-sales service are preferable for large-scale projects.
- **Compliance and Certifications:** RoHS compliance, UL ratings, and other industry standards. These manufacturers provide a range of solutions suitable for modern optical networks, ensuring durability, safety, and adaptability to evolving data center and telecommunication requirements.
