

Mini-module sliding door won t close

Overview

To fix a door that won't stay shut, check the hinges and tighten any loose screws, adjust the strike plate so the latch fits, use shims between the hinges and the frame, or replace the hinge pins with longer, thicker pins. If the problem persists, seek professional help. When a Town & Country power side door won't open on its own, start with the master lock, switches, fuses, track debris, and calibration. If your minivan's side door has stopped gliding open with the button or key fob, you're in the right place. This guide walks you through fast checks, deeper. If you are encountering a problem with door movement, first make sure to follow these instructions to eliminate basic issues before continuing troubleshooting: - Ensure that all 3 tracks (the upper track, center rail, and lower track) are clear of any blockages. Whether it's a sliding glass door that sticks, misaligns, or simply refuses to shut, understanding the root cause is the first step. If your automatic sliding door is not closing properly, there could be a few potential issues.

Chrysler Town And Country Sliding Door Won't Open Automatically ...

If the latch thinks it's closed or the pinch strip reads "blocked," the module won't drive the door. Lightly press the leading edge seal with the door partway closed; it should feel springy, not torn.

Passenger Sliding Door Issue (with video)

With the sliding door shut and ignition switched off, pull fuse F27 (right side) or F49 (left side) for a couple minutes to reset the corresponding power sliding door module. After reinserting the

Metris sliding door issue

Had the panel taken apart and found that when I disconnected the cable from the door module the actuator latch assembly would close it. Took it to

Sprinter Electric Sliding Door Issue

I made this video to show my service advisor the issue. It ended up needing the door module replaced.
