

## Moldova FTTH cold splice wholesale price

### Overview

28597 wholesale splice products are offered for sale by suppliers on Alibaba , of which fiber optic equipment accounts for 1%.

### Key Takeaways

FTTH cold splice kits in Moldova typically range from US\$40 per piece for basic mechanical splices to higher-end kits costing over US\$100, depending on capacity and features. Wholesale Pricing Overview

- Basic Cold Splice Kits
- Mechanical splice kits for FTTH installations are available at around US\$40 per piece from Chinese suppliers, suitable for small to medium-scale deployments .
- These kits often include cable strippers, cleavers, cleaning tools, and testing accessories, providing a portable, no-heat solution for field splicing .
- Enhanced Cold Splice Kits
- Kits with higher capacity (up to 48 fiber splices) and rugged, waterproof enclosures can cost US\$80-120 per kit depending on fiber type (single-mode OS2 or multimode OM3/OM4) and environmental protection ratings .
- These are ideal for medium to large-scale FTTH deployments and offer durability in outdoor or harsh conditions.
- Local Moldovan Suppliers
- Retailers like Fantastic.MD provide fiber optic accessories in Moldova with competitive pricing and fast delivery . While exact wholesale prices may vary, bulk orders can often be negotiated directly with the supplier.

- Local sourcing reduces shipping time and import costs compared to direct purchase from China.

#### Key Considerations

- Fiber Type and Capacity: Single-mode fibers (OS2) are standard for long-distance FTTH, while multimode fibers (OM3/OM4) are used for shorter links. Higher fiber counts increase kit cost.
- Environmental Protection: Kits with IP67-rated enclosures or reinforced silicone housing are more expensive but ensure long-term reliability in outdoor installations .
- Supplier Location: Chinese suppliers offer lower unit prices but may incur shipping and customs fees. Local Moldovan distributors provide faster delivery and easier warranty support .
- Performance Metrics: High-quality cold splices can achieve low insertion loss ( $\sim 0.1$  dB), which is critical for maintaining signal integrity in FTTH networks .

#### Recommendations

- For small-scale or trial deployments, consider purchasing basic kits from Chinese suppliers at around US\$40 per piece .
- For large-scale or outdoor FTTH networks, invest in enhanced kits with protective enclosures and higher fiber capacity, priced between US\$80–120 per kit .
- Contact local distributors like Fantastic.MD to negotiate bulk pricing and reduce lead times . By balancing cost, performance, and delivery logistics, network operators in Moldova can select the most suitable FTTH cold splice solutions for their projects.
