

NEMA4X Electric Cleaning Pen for Fiber Optic Endfaces

Overview

ELECTRO-WASH Fiber Optic Cleaning Pen This precision cleaner quickly cleans the end faces of fiber optic connectors, while eliminating electrostatic Electr.

Key Takeaways

The NEMA4X Electric Cleaning Pen is a precision tool designed to safely and effectively clean fiber optic endfaces, removing contaminants while preventing static buildup.

Key Features

- **Precision Cleaning:** The pen is engineered to clean the end face of fiber optic connectors, splices, and ribbons with high accuracy, ensuring optimal signal transmission and minimal insertion loss .
- **Electric Operation:** Unlike manual pens, the NEMA4X Electric Cleaning Pen uses a powered mechanism to dispense cleaning solution consistently, improving cleaning efficiency and reducing the risk of damage to delicate fiber surfaces .
- **Static Dissipation:** The cleaning formulation dissipates static charge, preventing airborne particles from adhering to the fiber endface after cleaning .
- **Durable and Safe:** The pen is designed to meet NEMA4X standards, meaning it is resistant to water and dust ingress, making it suitable for field use in harsh environments .

- **Residue-Free Solvent:** The cleaning solution is plastic-safe and evaporates quickly, leaving no residue that could interfere with optical performance .

Applications

- **Fiber Optic Connector Maintenance:** Ideal for LC, SC, MPO, and other connector types in high-speed networks.
- **Data Centers and Telecom Networks:** Ensures clean connections in critical infrastructure, reducing downtime and signal degradation .
- **Field and Laboratory Use:** Portable and non-pressurized, allowing safe transport and use in various environments .

Advantages Over Traditional Methods

- **Consistent Cleaning:** Electric dispensing ensures the right amount of solvent is applied every time, unlike manual wipes or swabs.
- **Reduced Contamination Risk:** Static dissipation and controlled solvent application minimize the chance of recontamination.
- **Compatibility with Cleaning Platforms:** Can be used alongside tools like the QbE Cleaning Platform or CCT Clean Connect Tool for combination cleaning processes .

Related Products

- **Fiber-Wash MX Pen:** Solvent-based, nonflammable, and fast-drying, suitable for precision cleaning of fiber endfaces .
- **Fluke Networks Solvent Pen:** Spring-activated aluminum pen dispensing 9 grams of fiber optic solvent through a felt tip, designed for patch cords and endfaces inside ports . The NEMA4X Electric Cleaning Pen is particularly valuable for professionals who require reliable, repeatable, and safe cleaning of fiber optic endfaces in both field and lab environments, ensuring high-performance optical connections and reducing the risk of network failures.
