

OLT Optical Line Terminal Price

Overview

OPTICAL NETWORK TERMINAL Price Check OPTICAL NETWORK TERMINAL price from the latest Cisco price list 2022. OLT Devices| High-Quality Optical Line Terminals.

Key Takeaways

OLT equipment prices vary widely, typically ranging from a few hundred to several thousand USD per unit depending on model, port density, and PON standard. Price Overview

The cost of an OLT depends on several factors including port count, supported PON standards (GPON, EPON, XGS-PON, 10G-EPON), uplink speed, and additional integrated features. Entry-level OLTs with low port density (e.g., 4-16 GPON ports) can start at \$500-\$1,500 per unit, while high-density, carrier-grade OLTs with 16-64 ports, 10G uplinks, and multi-service support can range from \$3,000 to over \$10,000 per unit .

Factors Affecting Price

- Port Density: More GPON/XGS-PON ports increase cost.
- Uplink Speed: OLTs with 10G or 40G uplinks are more expensive than 1G/10G models .
- PON Standard: XGS-PON and 10G-EPON OLTs are generally pricier than standard GPON or EPON units .
- Integrated Features: Some OLTs include ONU, router, Wi-Fi, or PoE modules, which can raise the price .

- **Brand and Supplier:** Chinese manufacturers (Guangdong, Hunan) often offer competitive pricing, while international brands like Adtran or FS may charge a premium for advanced features and support .

Purchasing Options

- **Direct from Manufacturers:** Alibaba and Made-in-China list factory-priced OLTs suitable for FTTH/FTTB deployments, often with bulk discounts .
- **Specialized Distributors:** FS and Adtran provide high-quality OLTs with technical support and warranty, suitable for telecom operators and service providers .
- **Custom Quotes:** For high-density or multi-service OLTs, contacting suppliers directly is recommended to obtain accurate pricing based on configuration and shipping .

Summary

OLT prices are highly variable, influenced by technical specifications, deployment scale, and supplier location. For small-scale FTTH networks, budget OLTs start around \$500-\$1,500, while carrier-grade, high-capacity OLTs can exceed \$10,000. Comparing multiple suppliers and requesting quotes is essential to secure the best price for your network requirements .
