

JEWELBLU OPTICAL SYSTEMS

Pakistani temperature measurement optical cable brand

Overview

Home Established in 1964 by Mr. M. Ismail Kasim, Premier Cables (Pvt) Limited is located at Federal "B" Industrial Area, Karachi, Pakistan Products – Fiber.

Key Takeaways

Litech, PTCL Cables, Bee & Berry, Premier Cables, and LTE Pakistan are leading optical cable brands in Pakistan suitable for temperature measurement applications. Key Manufacturers and Brands

1. Litech Pakistan Litech is a well-established brand offering a wide range of fiber optic cables, splicing machines, and networking solutions. Their products include high-quality optical fiber cables suitable for harsh environmental conditions, making them compatible with temperature measurement systems and distributed sensing applications. Litech collaborates with global brands like Sumitomo (Japan) and EXFO (Canada) and serves major telecom operators such as PTCL, Wateen, and Zong, ensuring reliability and technical support across Pakistan . 2. Pakistan Telecom Cables Limited (PTCL Cables) PTCL Cables has a state-of-the-art manufacturing facility capable of producing all types of optical fiber cables, including those used in industrial and instrumentation applications. Their optical fiber products are designed for durability and high performance, which is essential for temperature sensing in industrial environments . 3. Bee & Berry (Pvt.) Limited Bee & Berry specializes in optical fiber infrastructure and has recently started local manufacturing in Islamabad. They produce optical fiber joint enclosures, FTTH/GPON components, and fiber termination solutions. Their products are designed to withstand mechanical stress, vibration, and environmental challenges, making them suitable for temperature measurement and telemetry applications . 4. Premier Cables Premier Cables manufactures a wide range of fiber optic cables, including aerial, duct, and buried types. Their products are used in long-haul transmission networks and FTTH applications, and they maintain ISO 9001:2015 certification, ensuring high-quality standards suitable for industrial sensing and monitoring systems . 5. LTE Pakistan LTE Pakistan is a prominent manufacturer of fiber optic cables and accessories, offering solutions for FTTH, aerial, duct, and buried installations. They provide services including laying, jointing, testing, and maintenance, adhering to international quality standards, which makes their cables reliable for temperature measurement and distributed sensing applications .

Considerations for Temperature Measurement Applications

- Cable Type: For distributed temperature sensing (DTS), single-mode optical fibers are typically preferred.
- Environmental Resistance: Look for cables with high-strength coatings or armored designs to withstand heat, moisture, and mechanical stress.
- Compatibility: Ensure the cable is compatible with DTS equipment or optical fiber temperature sensors.
- Local Support: Choosing a manufacturer with local technical support, such as Litech or Bee & Berry, can facilitate installation and maintenance. These brands provide a strong foundation for sourcing optical fiber cables in Pakistan suitable for temperature measurement, industrial monitoring, and telemetry systems.
