

Price of Large Network Cabinet Stands

Overview

Shop durable network cabinets built from cold-rolled steel. Secure your IT and AV equipment with lockable glass doors and side panels.

Key Takeaways

Large floor-standing network cabinets typically cost between \$300 and \$800, depending on size, features, and ventilation options. Price Overview

Network cabinet prices vary widely based on type, size, and features. Wall-mounted cabinets are generally smaller (6U-12U) and cost between \$100 and \$260, suitable for home offices or small retail setups. Large floor-standing cabinets, which are ideal for extensive installations or data centers, range from \$300 to \$800 for standard models with good ventilation and accessibility. Specialized outdoor or high-security cabinets can exceed \$3,000 .

Factors Affecting Price

- **Size and Capacity:** Cabinets are measured in "U" units (1U = 1.75 inches). Larger cabinets (e.g., 24U-47U) cost more due to increased material and space.
- **Material and Build Quality:** Steel or reinforced cabinets with lockable doors and robust frames are more expensive.
- **Ventilation and Cooling:** Cabinets with built-in fans, perforated doors, or airflow management features increase cost.
- **Protection Rating:** IP-rated cabinets (e.g., IP20, IP55) for industrial or outdoor use are pricier

- Additional Features: Glass doors, cable management systems, and adjustable rails add to the price .

Where to Buy

- Network Supply offers a wide range of professional-grade cabinets and racks suitable for corporate or home lab setups .
- Intellinet Europe provides cabinets with various protection ratings for industrial and IT environments .
- Network Cabling UK stocks Excel Environ cabinets from 6U to 47U, including wall-mounted and floor-standing options .
- Amazon UK carries smaller wall-mounted cabinets and mid-range floor-standing models for quick delivery .

Summary

For a large network cabinet stand, expect to budget \$300–\$800 for standard floor-standing models, with higher-end or specialized units costing significantly more. Choosing the right cabinet depends on your network size, security needs, and environmental conditions. Proper planning ensures both equipment protection and efficient cable management.
