

Price of splice-free fiber optic patch panels

Overview

Price List: Fiber Patch Panels | RLH Industries, Inc. Please view our full RLH price list and contact us at info@fiberopticlink.com if you have any question.

Key Takeaways

Splice-free fiber optic patch panels typically range from \$50 to \$400 per unit, depending on port count, connector type, and rack configuration.

Splice-free fiber optic patch panels are designed to terminate pre-terminated fiber cables without requiring fusion or mechanical splicing, simplifying installation and reducing labor costs. They are commonly used in data centers, telecom rooms, and enterprise networks.

Price Range

- Small panels (12-24 ports, 1U or 2U): Approximately \$50-\$150 for basic LC or SC connector types, suitable for low-density applications (FiberTek, Fiber4u) .
- Medium panels (24-48 ports, 2U-4U): Typically \$150-\$300, often preloaded with adapters or pigtails for plug-and-play deployment (CommScope FPX series) .
- High-density panels (48-96 ports, 2U-4U): Can cost \$300-\$400 or more, especially if pre-terminated with MPO or LC connectors and designed for modular expansion .

Factors Affecting Price

- Port Count: More ports increase material and manufacturing costs.

- Connector Type: LC, SC, ST, or MPO connectors have different costs; MPO and high-density LC panels are more expensive.
- Rack Unit Size: 1U panels are cheaper than 2U or 4U sliding or modular panels.
- Pre-terminated vs Empty: Panels shipped with pre-installed pigtails or adapter packs cost more than empty panels that allow custom termination.
- Indoor vs Outdoor/Plenum Rating: Panels rated for plenum or outdoor use are priced higher due to compliance with fire and environmental standards.

Purchasing Tips

- Contact suppliers for quotes: Many vendors, including RLH Industries, FiberTek, Fiber4u, and CommScope, provide pricing upon request for specific configurations .
- Consider modular panels: Modular or “grow-as-you-go” panels allow future expansion without replacing the entire unit, which can save costs in the long term.
- Check stock availability: Some models may be out of stock, so confirm lead times with the supplier. In summary, splice-free fiber optic patch panels are generally affordable for small deployments but can reach several hundred dollars for high-density, pre-terminated solutions. For exact pricing, it is recommended to request a quote from the supplier based on your required port count, connector type, and rack configuration.
