

Router connected to China Mobile fiber optic cable has no network

Overview

Restarting your router, checking your modem connection, and resetting network settings often resolve the problem quickly. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. Despite multiple attempts, the Archer AX6000 v1. The blue light on top of the router spins around for a. There are 3 boxes with tons of cables and I have no clue how to connect the MT6000 to that mess. I guess the reason is fiber cables. My ISP upgraded us to fiber into the home service (with a new fiber modem/gateway in bridge mode). Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). If your modem has multiple network ports, ensure that the router's WAN port is connected to the correct network port (usually the leftmost network port on the port panel) of the modem.
