

Singapore Fireproof and Resistant Cable Trays

Overview

FRP Cable Trays Supplier in Singapore | Ferrotech
Ferrotech's FRP Cable Trays offer high strength, corrosion resistance, fire safety, and customized solution.

Key Takeaways

FRP/GRP cable trays are highly recommended in Singapore for fireproof, corrosion-resistant, and durable cable management systems.

Fiberglass Reinforced Plastic (FRP) or Glass Reinforced Plastic (GRP) cable trays are widely used in Singapore for fireproof applications. They are manufactured from fire-retardant resins and reinforced with fiberglass, providing high strength, chemical resistance, and UV stability. These trays are non-conductive, eliminating the need for grounding, and are suitable for harsh environments such as chemical plants, refineries, and outdoor installations.

Key Features:

- Fire Retardant: Compliant with ASTM E-84 and NEMA FG-1 standards, offering Class 1 fire rating.
- Corrosion Resistant: Ideal for acidic or marine environments where metallic trays may degrade.
- UV Resistant: Maintains structural integrity under prolonged sun exposure.

- **Lightweight and High Strength:** Supports heavy cable loads while being easier to install than metal trays .

- **Halogen-Free:** Reduces toxic gas emission in case of fire .

Material Options:

- **Isophthalic Polyester (IFR):** Industrial grade with balanced fire retardancy and corrosion resistance.

- **Vinyl Ester Resin:** Offers higher chemical resistance with fire-retardant properties .

Other Fireproof Options

While FRP/GRP is preferred for fireproof and non-conductive applications, stainless steel (SS304, SS316, SS316L) and aluminium trays are also available with fire-resistant coatings. These are suitable for environments requiring mechanical robustness and compliance with IEC 61537 standards .

Recommended Suppliers in Singapore

- **Ferrotech** – Offers FRP cable trays with fire-retardant resins, UV resistance, and high load capacity. Options include Isophthalic Polyester and Vinyl Ester resin trays .

- **AEHub** – Supplies FRP/GRP and stainless steel cable trays certified to ASTM E-84, NEMA FG-1, and IEC 61537 standards .

- **Wanco Electric** – Provides FRP/GRP, stainless steel, aluminium, and coated steel trays suitable for fireproof applications .

Conclusion

For fireproof cable management in Singapore, FRP/GRP cable trays are the most recommended due to their fire retardancy, corrosion resistance, and non-conductive properties. When selecting a tray, consider fire rating, chemical exposure, load requirements, and installation environment, and source from reputable local suppliers like Ferrotech, AEHub, or Wanco Electric to ensure compliance with safety standards .
