Straighten and fix both ends of the outdoor optical cable

Overview

This wikiHow article will teach you how to splice a cut fiber optic cable back together with a fiber optic stripper and cutter and a fiber optic crimper. Trim off any frayed or damaged ends of the cable. ① The connection environment should be dustproof, waterproof and shockproof. It is best to choose it in the connection car. If there are no conditions, a connection tent should be used, and a workbench and a work chair should be set up; ② Arrange the connection point and test point personnel in. Fiber optic cables are critical components of modern communication networks, transmitting vast amounts of data at lightning speeds. However, physical damage can disrupt this infrastructure and cause significant network issues. Fiber optic cables are the unsung heroes behind lightning-fast data. Fiber optic cable repair involves cutting out the damaged section, stripping and cleaning the fiber, then rejoining the ends with a mechanical or fusion splice and testing signal integrity.
