

Sxp optical module

Overview

A 1000BASE-SX SFP (Small Form-factor Pluggable) is a hot-swappable, compact optical module designed for Gigabit Ethernet (1000Mbps) communication. The "SX" designation signifies its use with short-wavelength (850nm) lasers over multimode fiber (MMF). This manual contains notices you have to observe in order to ensure your personal safety, as well as to prevent damage to property. The notices referring to your personal safety are highlighted in the manual by a safety alert symbol, notices referring only to property damage have no safety alert. In the world of fiber optics, "Short Wavelength" specifically refers to light in the 850nm range. Wavelength: It uses an 850nm laser (invisible infrared light). These modules convert electrical signals from. The transceiver module receives 10Gb/s electrical data and transmits the data as an optical signal. Payment options are offered by Affirm and are subject to an eligibility check and might not be available in all states. This transceiver requires a single supply voltage of 3. It is ideal for 10GE Ethernet switches, 10GE.
