

What is the adhesive tape used on 3M junction boxes

Overview

3M solar acrylic foam tapes technology enables the rapid attachment of junction boxes on solar modules. The easy, no-mess application of junction boxes with die-cut 3MTM Solar Acrylic Foam Tape allows for faster fabrication and can result in a cleaner look, compared to liquid adhesives with acrylic foam, which is viscoelastic in nature. Rather than a temporary fix until you find a better product, 3M VHB tape is the solution. These adhesive tapes are designed to permanently adhere to practically any surface, including metal, wood, glass, and many. 3M Super 33+, Super 35, and Super 88 vinyl electrical tapes deliver the proven performance electrical contractors trust for critical insulation, color coding, and bundling applications. Engineered to maintain adhesion from 0°F to 221°F with up to 250% stretch capability, these UL Listed tapes.
