

What material is XQJC cable tray made of

Overview

The cable trays consist of a thin metallic plate and electro-welded steel rods. Their construction is based on the international standard IEC 61537, which specifies the requirements for cable tray systems, tests, and specifications. These trays may be made of wire mesh, called "cable basket", or be designed in the form of a single central spine (rail) with ribs to support the cable on either side. Channel Tray provides an economical support for cable drops and branch cable runs from the backbone cable tray system. Channel. Keywords: XQJ series cable tray, the material is divided into steel bridge, stainless steel bridge, aluminum alloy bridge, flame retardant FRP bridge Filling in your phone and email information will help us get in touch with you in a timely manner and solve your problem as soon as possible. Every payment you make on Alibaba. com is secured with strict SSL encryption and PCI DSS data protection protocols Claim a refund if your order doesn't ship, is missing, or arrives with product issuesXQJ-C trough cable tray is a fully enclosed type of cable tray.
