

What router should I pair with a fiber optic GPO

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Upgrading to a router built for fiber optic means matching multi-gig WAN ports with a backplane that can actually forward packets at wire speed, not the sub-1 Gbps ceiling older hardware imposes. I'm Fazlay Rabby — the founder and writer behind Thewearify. To simplify. This review aims to unveil some of the best fiber optics routers on the market by focusing on their key features and showing how they would become efficient tools for both home and office networks.
